

KPU Registry ID Number: 1027. Date this summary of results was received: 09 April, 2021. This information on the results of a study registered at the KPU Registry was provided by the experimenter and has not been evaluated by KPU Registry personnel.

## **Summary of Results for the KPU Study Registry**

Retroactive Facilitation of Recall and Music

Julia Mossbridge  
jmossbridge@noetic.org

This summary reflects the results of the analyses as understood on 09 April, 2021. See the associated registration document for more information about the study plans and procedures.

The confirmatory study was negative -- the hypothesis was not confirmed. No psi effects in any direction, no gender difference either. I also turned against this task in general -- because of inter-individual noise being so profoundly impactful.
