Major research interests

Investigating the psychology of paranormal belief and experience, particularly factors causing precognitive dream experiences. Also, interested in the effects of participant and experimenter beliefs on the outcome of parapsychological experiments.

Grants held

I currently hold a three-year research fellowship from the Perrott-Warrick Fund (commenced Oct 2010), and also hold one Bial Foundation Grant (with Dr Ian Tierney) for the project: "A test of the Model of Pragmatic Information using European cases of anomalous experiences". Principal funding sources in the past have been the Bial Foundation (Portugal), the IGPP (Freiburg), and the Perrott-Warrick Fund (Cambridge).

Teaching

Undergraduate:

Since session 99/00 – Fourth year option in Parapsychology
Session 06/07-08/09 – Second year course in Methodology and Statistics
Since session 06/07 – Third year module on Meta-Analysis
Since session 99/00 - Supervision of final year dissertations.

Postgraduate/MSc:

Currently principal supervisor to 2 students in progress, and a third completed; co-supervisor to 4 completed students, one in progress. While employed on short-term contracts (Jun 86-Feb 06) I did not take on principal supervision of PhD students.

Course convenor and lecturer on new MSc by Research Module entitled Methods for the Study of Anomalies, Beliefs, and Extended Communication (8hrs; 04/05).

MSc by Research Special Topics topic Methodological Issues in Parapsychology (2hrs; 03/04 and 04/05).

Online:

In 2008 I designed and launched a new non-accredited distance-learning online Introduction to Parapsychology course. This is a knowledge transfer activity, with start-up costs funded by a University of Edinburgh KT grant.
